A Rare Blue Diamond An Unsuspecting Jeweler

When a killer stalks a small beach town, no one is safe.

A psychology professor's world turns upside down when she interrupts an armed robbery in her grandfather's jewelry store. Before being rushed to the hospital, Kimberley West's grandfather entrusts her with guarding a five-carat, flawless blue diamond. There's just one problem: Small-town jewelers seldom deal in rare gemstones worth millions.

A mysterious phone call convinces Kim the diamond is connected to the recent murder of her grandfather's best friend. As the attacks continue, she realizes no one will be safe until she solves the mystery surrounding the diamond.

Armed only with her standard poodle, expertise in gemstone lore and insight into the human obsession with all things shiny, Kim races to outwit a thief who's not afraid to kill.

From the Author:

The Blue Diamond grew from a newspaper article about people turning the ashes of their loved ones into diamonds. My first response was "ewwww". But then my mystery writer genes kicked in and I started wondering how I could use this in a murder mystery.

As I searched for the answer, I was drawn into a world of intrigue, danger and death. From the ice fields of Canada to the humid South African plains, from the late 19th century diamond hoax to the 20th century invention of "a diamond is forever," humans have fallen for the diamond's siren call. What mystery writer could resist?
